

Kit Bag

With its legendary size, our Kit Bag is one of the best ways of keeping your gear together - wherever your adventures take you. The removable, adjustable shoulder straps, can cleverly convert the Kit Bag into a rucksack or chair when paired with a camping thermarest.

1. Traditional Kit Bag

With a shoulder strap clipped to both central D-Rings on each side, its easy to carry the Kit Bag full of gear anywhere. Fold the roll top closure down five times and secure with the side release clips.

2. Rucksack Kit Bag

Lengthen and reposition the shoulder straps to clip onto one side of the bag, at the middle and bottom outer D-Rings to transform the Kit Bag into a Rucksack.

3. Camping Chair Kit Bag

Lengthen and reposition both shoulder straps to clip to one side of the bag, at the top and bottom outer D-Rings to start the Kit Bag to camping chair transformation.

Insert a partially inflated, folded camping thermarest, fold the top down 5 times and clip to secure. Fold the Kit Bag in half with the straps on the outside. Tighten the straps to the desired length. Sit back and relax...
